Annualized Beta (3 Year)	1.04	
Annualized Information Ratio (3 Year)	0.73	

### INVESTMENT STRATEGY

**We seek to build a diversified portfolio of global small cap (ex US) stocks that systematically captures the factor inefficiencies and liquidity premia within the asset class.**

- Quantitative modeling allows us to efficiently assess the entire universe and evaluate the risk premia.
- A fundamental overlay ensures model output is in alignment with the current economic environment and the portfolio's fundamental characteristics and risk profile remain in-line with the index.
- We believe that investing in the less liquid half of the benchmark enhances the ability to generate alpha.

*We believe an allocation to Global Small Cap (ex US) offers investors the opportunity to exploit a structurally inefficient asset class with attractive diversification characteristics.*

## ABOUT OUR FIRM

DuPont Capital has a long history of institutional asset management. Our parent company, DuPont, established a retirement pension plan for employees in 1942, and in 1975 created a separate pension management division.

In 1993, DuPont Capital was established and became an SEC registered investment advisor. We share our parent company's history of innovation, and over the years, have been on the forefront of developing global investment opportunities in both traditional and alternative strategies across equity, fixed income, and alternative investments.

## PERFORMANCE DISCLOSURE: DUPONT CAPITAL GLOBAL EX-US SMALL CAP STRUCTURED EQUITY

Year	Gross Return (%)	Net Return (%)	Benchmark Return (%)	Composite 3-year Std Deviation (%)	Benchmark 3-year Std Deviation (%)	Number of Portfolios	Internal Dispersion (%)	Composite Assets (\$ millions)	Total Firm Assets (\$ millions)

- DuPont Capital Management (DCM) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. DCM has been independently verified for the periods January 1, 1993 through December 31, 2016. The verification reports are available upon request.
- Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.
- DCM is an investment adviser registered under the Investment Advisers Act of 1940. DCM is a wholly owned subsidiary of E. I. du Pont de Nemours and Company and specializes in institutional investment management services, utilizing a variety of investment strategies and styles. E. I. du Pont de Nemours and Company is a subsidiary of DowDuPont Inc. Registration does not imply a certain level of skill or training.
- DCM Global Ex-US Small Cap Structured Equity Composite (Inception Date – 01/01/2015) includes all accounts invested in global small cap (ex-US) securities that utilize a quantitative value-based strategy that ranks stocks based on several measures of value, sentiment and improving risk. Portfolio optimization influences stock weighting. This strategy is industry and country neutral.
- The composite benchmark is the MSCI ACWI (All Country World Index) Ex-US Small Cap Index, which captures small cap representation across 22 of 23 developed markets countries (excluding the US) and 24 emerging markets countries. With 4,355 constituents, the index covers approximately 14% of the global equity opportunity set outside the US. This index is net total return which reinvests dividends after the deduction of withholding taxes. The returns for this index do not include any transaction costs, management fees or other costs. You cannot directly invest in this index.
- Performance results reflect the reinvestment of dividends and other earnings. Valuations are computed and performance is reported in U.S. dollars. Composite returns are calculated net of non-reclaimable withholding taxes. Gross-of-Fees returns are presented before management and custodial fees but after all trading expenses. Net-of-Fees returns are calculated monthly by deducting 1/12th of the highest applicable fee rate in effect for the respective time period from the gross composite return. The DCM Global Ex-US Small Cap Structured Equity Composite fee schedule is as follows: 0.85% first \$25 million, 0.80% next \$25 million, 0.75% thereafter.
- Securities and other instruments in which the composite invests may be denominated or quoted in currencies other than the U.S. dollar (Base Currency). Changes in foreign currency exchange rates can affect the value of an investor's account. This risk, generally known as "currency risk," means that a strong U.S. dollar (Base Currency) will reduce returns for investors while a weak U.S. dollar (Base Currency) will increase those returns.
- The ex-post three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. For those periods with less than 36 monthly returns, "N/A" is noted.
- Internal dispersion is calculated using the equal-weighted standard deviation of annual gross returns of those portfolios that were included in the composite for the entire year. For those periods with five or fewer accounts included in the entire year, "N/A" is noted as the dispersion is not considered meaningful.
- Past performance is not indicative of future performance. It should not be assumed that results in the future will be profitable or equal to past performance. These performance disclosures apply to all of the DCM investment performance data presented herein.
- This composite was created in January 2018. A list of composite descriptions is available upon request as are policies for valuing portfolios, calculating performance, and preparing compliant presentations.
