

Real-time insight on how DuPont Capital has positioned its portfolios as a function of key factors driving the markets.

COMMENTS (as of November 15, 2018)

VALUATION	Russia and Turkey remain the highest ranked countries due to their attractive valuations, however, they have above average risk profiles. Hungary, South Korea, and Poland have a more balanced valuation/country risk dynamic. China, India, and Peru are the least attractive from a valuation standpoint within emerging markets.
RISK	Argentina, Egypt, and Turkey rank as the riskiest countries per our model. Although risk levels seem to be stabilizing in Argentina and improving in Turkey. Growing economies and conservative fiscal policies cause Chile, Czech Republic, and Poland to be positive standouts from a risk perspective.
SIGNS OF IMPROVEMENT	Higher oil prices are driving improvements in Qatar and Russia, while Brazil is benefiting from the election of a pro-business government. Argentina and Turkey currency struggles have carried over from the third quarter, however, recent performance suggests the worst may have passed.

Please note the chart and commentary above are as of November 15, 2018, and are subject to change without notice. The above chart is provided to demonstrate our investment philosophy and analytical process only, and should not be considered a recommendation. The country rankings shown will not always reflect the positioning of our portfolio for idiosyncratic or stock selection reasons. The Emerging Markets Equity country valuation metrics above may vary from those of our Emerging Markets Debt strategy due to differences in evaluation measures. Investing involves risks.

Our research indicates countries with low equity market valuations and undervalued real effective exchange rates outperform. We utilize our proprietary risk and valuation models to identify countries with low investor expectations, but solid economic fundamentals.

The charts on the preceding page illustrate the output of our country risk and country valuation models, as well as a scoring of any signs of improvement for each country in the MSCI Emerging Markets Index. The scoring is aggregated to generate an overall country ranking.

Our fundamental analysts incorporate the following factors in their analysis:

Country Risk

- ❖ Political Score
- ❖ Financial Score
- ❖ Economic Score

Valuation

- ❖ Real Effective Exchange Rates for Currency Valuation
- ❖ Bottom-up P/E ratio for Stock Valuation

Signs of Improvement

- ❖ Changes in CDS spreads
- ❖ Estimates revisions

ABOUT OUR FIRM

DuPont Capital has a long history of institutional asset management. Our parent company, DuPont, established a retirement pension plan for employees in 1942, and in 1975 created a separate pension management division.

In 1993, DuPont Capital was established and became an SEC registered investment advisor. We share our parent company's history of innovation and, over the years, have been on the forefront of developing global investment opportunities in both traditional and alternative strategies across equity, fixed income, and alternative investments.
